## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, US Patent 6,028,860, discloses a method and an apparatus for prioritize virtual connection transmission comprising a tree-based topology network having a root node and a plurality of leaf nodes. However, the prior art of record fails to teach or make obvious the step of or means for **"storing for each node of said network, other than said leaf nodes, a pointer to whichever of its two adjacent downstream nodes effectively points to a leaf node whose associated circuit currently has highest transmission priority, thereby providing said root node with a pointer to the circuit currently having highest transmission priority"**, when the storing is considered within the specific structure of the method recited in claim 1. The prior art of record fails to teach or make obvious the step of or means for **"storing, for each of said 2<sup>N</sup> leaf nodes of said network, first information representative of priority of transmission of a packet that may be awaiting transmission from an associated communication port over said serialized data path"**, when the storing is considered within the specific structure of the method recited in claim 3 or the device recited in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
